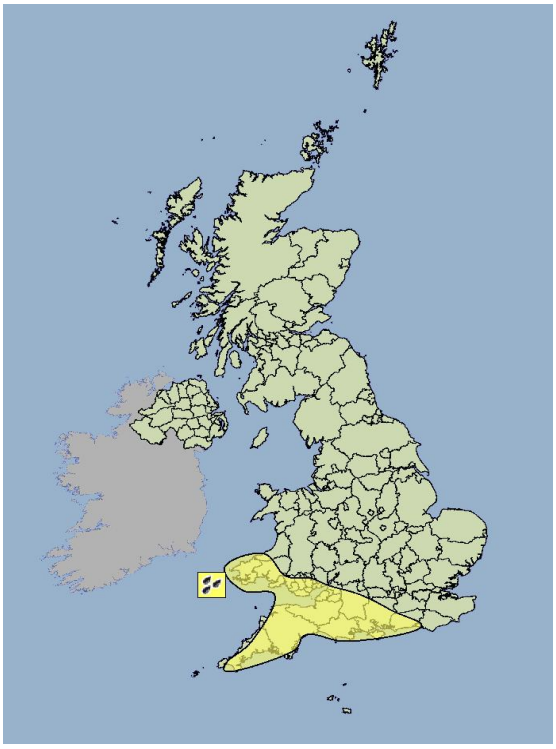
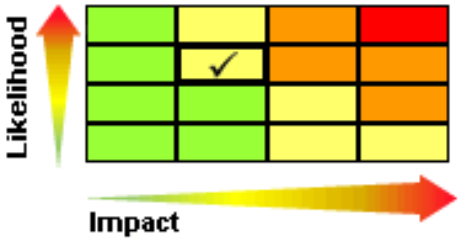
National Severe Weather Warning Service





Chief Forecasters Assessment
Heavy showers are expected to develop around midday on Saturday, with some thunderstorms likely during the afternoon, when they will tend to become organised into bands. Hail is also likely in some of the showers. The heaviest showers and thunderstorms could produce 20-25 mm of rain within an hour in a few places.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **12:00 on Sat, 28th May 2016** until **21:00 on Sat, 28th May 2016**

Although some places will remain dry during Saturday, scattered heavy showers and thunderstorms are likely to develop through the afternoon and continue into the evening in places, so be aware of the potential for localised surface water flooding, whilst lightning and hail will also be additional hazards for travel and outdoor activities.
